Arjun Telecom Pvt. Ltd was started in the year 2013 as an ISP with a License from the Department of Telecom.

Arjun Telecom is an Internet Service Provider, specializing in Internet Bandwidth, Internet Data Centers, and VoIP services, Managed Hosting, Remote Infrastructure Monitoring & Management, Mail & Messaging Services and Application Hosting Services.

Our processes are designed as per ITIL framework, combining world class bandwidth services with advanced technology and professional service capabilities. We deliver mission critical bandwidth solutions for world's best known enterprises from multiple locations to their customers in a secure and seamless manner.

We have multiple carrier-neutral POP's located in Tamilnadu. These are equipped with best-in-class infrastructure, tools and skilled personnel giving our customers seamless connectivity solutions with redundancy to any of these POP's. Arjun Telecom assures mission critical support to its customers in association with its major service providers for local loops and alliance partners for application hosting services.

Service Offerings

Premium Internet Services through Dedicated Leased Lines (ILL)

If you need uninterrupted bandwidth performance for your organization, Arjun Telecom Pvt Ltd. connects you to a Dedicated Internet port ensuring the dedicated port speed. The service is recommended for organizations requiring consistent Internet bandwidth. This service is available for ports varying from Multiple E1's, DS3, STM-1 and so on. On the other hand, if you want to derive the benefit of extra bandwidth besides the committed speed, we connect you to a shared port. This service gives access to a committed bandwidth and option of pulling extra bandwidth subject to the application being used and the connections on to the port and is available in the ratios of 1:1 primarily. Since we are a corporate dedicated Service providers operating on i2i, SE ME WE3 & 4 and Flag submarine cables, we provide one of the "Best Services & SLA in the Industry "

Virtual Private Network (VPN)

Arjun Telecom Pvt. Ltd is one of the few service providers in the country to offer Internet VPN service with the use of dedicated equipment and large-scale encryption so that the company remains in constantly connected with multiple fixed sites with a very secure firewall.

Service Beyond Expectation

Dr. CHITRAA R. CHANDRAN

TAGORE DENTAL COLLEGE & HOSPITAL
RATHINAMANGALAM, VANDALUR POST
VELAKOTTAIYUR, CHENNAI-600 127.

Internet Data Center (IDC)

A Data Centre is a centralized repository, either physical or virtual, for the storage, management, and dissemination of data and information organized around a particular body of knowledge or pertaining to a particular business

We provide the ideal Hosting environment for businesses in global and emerging markets. If you have servers to be deployed or want to outsource, you'll find that we have the infrastructure, services, tools and experience to help you in every step of the way.

Our Network is designed and builds with highly scalable redundant bandwidth connections to the Internet over multiple cable systems to ensure reliability and availability. We are peered with tier 1 service providers across the globe to ensure redundancy with best paths and minimum latency to destinations across the globe.

We have multiple STM4 ring last miles to the Internet from our Data Centers, and this includes multiple redundant last miles from multiple providers.

Carrier neutrality provides flexibility to work with multiple carriers providing better geographical spread for connecting customer location to the Arjun Telecom Network Data Center.

Our data center is served by from two different power generating sources. Apart from the redundant power sources with DG backup.

At distribution level Dual UPS (uninterrupted power supply) systems and a Dual Bus power architecture up to rack level.

Advanced HVAC (Heating, Ventilating, and Air Conditioning) systems providing optimal server operating conditions. Sophisticated fire detection and suppression systems.

We are 24/7/365. Call us at any time - we'll be here. It's part of our Support commitment.

Voice over Internet Protocol - VoIP

VoIP stands for Voice over Internet Protocol. It means the transmission of voice and call control data over the Internet. In other words, this technology allows you to make phone calls over the Internet.

Service Beyond Expectation

Dr. CHITRAA R. CHANDRAN
PRINCIPAL
TAGORE DENTAL COLLEGE & HOSPITAL
RATHINAMANGALAM, VANDALUR POST
MELAKKOTTAIYUR, CHENNAI-600 127.

Benefits of VoIP -

- The main advantage is the amount of money you end up saving on your phone bills as compared to a traditional phone line.
- Inexpensive and easy to use. Since it is simple, upgrading is relatively simpler too.
- With VoIP on your network, you no longer need separate cabling for your telephone system. With
- VoIP PC-to-PC, calls are free no matter the distance and PC-to-Phone charges are nominal. For a
- monthly fee you may make unlimited free calls within a geographic area.
- A virtual number enables you to make calls from anywhere as long as a broadband connection is available.
- You may access your VoIP account just like your email Id from anywhere in the world as long as you have an internet phone. This makes it easy for those who travel frequently to make calls frequently to those back at home at local call rates, no matter where they are.
- You may call or message or do both at the same time with VoIP services.
- VoIP cost about half the cost of traditional phone services and also your bill is easier to understand and it can be viewed via the Internet.
- Value added features: There are many other features that make VoIP attractive. Call forwarding, call waiting, voicemail, caller ID and three-way calling are some of the many services included with Internet telephone at no extra charge.

Quality Advantage

- Highly reliable
- Multiple ring architecture
- Swift trouble shooting
- 24 x 7 NOC
- Integration of multiple technologies is possible
- ATM Switching & SDH

Infrastructure

We have high-end infrastructure with a NORTEL BCN 73000 router and Cisco 7500 and 7200 series at the backbone. We have various Cisco routers for end connectivity to customers. We link to Internet through various undersea cables through the East coast and west coast of India. Our internal network is on layer 3 switch from Nortel and structured cabling is from Panduit. We have very efficient and high-end power backup system in place.

Connectivity

Arjun Telecom Pvt Ltd is connected to the PSTN via multiple STM4 multiplexer on optic Fiber links to Various Telco's like Vodafone, Sify, TATA, Bharti, BSNL and Reliance and is multihued to the Internet via multiple links. This ensures a loss less connection to the PSTN and the Internet. Your company will be connected to the Internet through us on a leased circuit provided by one of the Telco's here.

Service Beyond Expectation

Dr. CHITRAA R. CHANDRAN
PRINCIPAL

TAGORE DENTAL COLLEGE & HOSPITAL
PATHINAMANGALAM, VANDALUR POST
ELAKOTTAIYUR, CHENNAI-600 127.

Program management

We have a dedicated project implementation team which co-ordinate with vendors, Telco and internal Departments and complete the commissioning of the circuit as per the schedule. Arjun Telecom Pvt Ltd will put all required efforts make link installed and operational, however any delays due to government agencies cannot be avoided. After installation, end to end testing is done and the circuit is handed over to the customer support department for the post implementation support.

Experience

Tie-up leading network providers like Vodafone, Bharti, SingTel, Tata and Reliance, Arjun Telecom Services would leverage the basic services network, Long distance OFC and Sub-marine cable landing stations at Chennai and Mumbai. We have implemented multiple links across various Networks and Telco's.

Advantages

- Higher usable Bandwidth.
- Dynamic routing.
- International Surfing Quality
- Faster downloads.
- Service level Agreements.

Connectivity Features and Advantages

- Level 3 connectivity.
- Best infrastructure connecting most US exchanges.
- Expansion flexibility.
- Consistent performance and Redundancy.

Key SLA Features

1. Port Availability:

Arjun Telecom Network guarantees that the link between Internet Port at the Router at the Arjun Telecom network operating center and the internet backbone will be available for 98.5% of the time when measured on an average Annual basis.

2. Service Outage:

Service Outage incident shall mean: An interruption of service lasting at least (15) fifteen continuous Minutes and an interruption of service due to a failure in link other than the local loop between the subscriber's premises and the Arjun Telecom operating center where the Subscriber's circuit is terminated.
