

GOALS & OBJECTIVE

- Create a supportive environment for the demanding and intellectually stimulating course.
- Enable the students to cultivate the desire for lifelong learning and maximise their potential.
- To equip the students to become decision makers, innovators in the globalised economy.
- To inculcate a truthful, responsible attitude for patient and community care, with good soft skills.
- To provide the state of the art infrastructure.
- To offer quality health care services to all strata of society.
- To contribute to social, economic and national development.
- To felicitate research and share knowledge to the benefit of the society.
- To establish a team of well-equipped faculty to enable the institution to grow holistically and achieve the above objectives
