Programme – Specific learning outcomes

2.6.3 THE TEACHING LEARNING AND ASSESSMENT PROCESSES OF THE INSTITUTION ARE ALIGNED WITH THE STATED LEARNING OUTCOMES.

OUTCOME MAPPING/ PROGRAMME MAPPING:

Outcome mapping facilitates the alignment of course level outcomes with program outcome, i.e., how well the course outcome operate to achieve the program outcome. The mainstay focus of outcome mapping is to assess student learning. The chart below shows the calibration of the CO in relation to the PO.

PROGRAM OUTCOME ANALYSIS REPORT:

The program outcome mapping interpretation report reveals that the objectives of the course outcome are well aligned with the objectives of the program outcome. The outcomes were assessed in technical, cognitive and knowledge oriented aspects. The outcomes were assessed based on stated objectives using tools like examinations, viva voce, OSPE and OSCE so there is a common unbiased framework for assessment amongst the students and faculty members. This also helps to enable the students understand the desired learning outcomes and diagnose their strengths and weaknesses.

Overall the attainment of PO values ranged between moderate and substantial. The lacunae in individual courses have been analysed in the analysis report of the individual subjects. A corrective action plan is framed by each course head to improve the outcome and implemented for the next academic year and reviewed again. If the corrective action plan brings an improvement in the outcome the plan is retained and executed for the subsequent batches. If the plan does not bring about the desired outcome the action plan is aborted and an alternative action plan is sought.
