Greetings From Tagore dental College

This highly interactive workshop provides interns with the essential knowledge and skills for placing a dental implant. With small group participation in a comfortable setting, this workshop with live demo provides unique personalized learning experience.

Workshop objectives:

1. To introduce the participant to the basic concept of use of implants in replacing missing teeth.
2. To demonstrate surgical implant placement and prosthetic restoration by live demo.
3. To expand your mind on the possibility of the use of dental implants in different clinical situations.
4. To appraise the participant on the current status of dental implants.
