

## **OralDETECT TRAINING AND CALIBRATION FOR EARLY DETECTION OF ORAL CANCER**

The "OralDETECT" structured training program consists of an initial pre-test, accompanied by a well-planned series of lectures, with interspersed evaluations and input on the results. A panel of specialists in Oral Pathology and Oral Medicine have validated the entire lecture series and the tests for content and relevance. Participants can gain the ability to identify target [oral potentially malignant / oral cancer (OPMD / OC)] and non-target (non-OPMD / OC) lesions during the course.

Date: 21<sup>st</sup> Feb 2020 (FRIDAY)

Time: 8:30 am to 5:00 pm

Venue: Tagore Dental College

Facilitators:

Prof. Dr. RosnahBinti Zain

Dr. Anand Ramanathan

### **Objectives of the program:**

- To educate, train and calibrate the undergraduate students and dental practitioners for early detection of oral cancer through "OralDETECT" - a Spaced Test-Enhanced Learning tool.

### **Outcome of the workshop:**

#### **At the end of the workshop the participants should be able to:**

- Recognize and differentiate the common and atypical oral lesions
- Recognize and detect any abnormal changes in the oral mucosa suggestive of malignancy
- Recognize the risk factors of oral cancer.

### **Who should attend?**

This workshop is intended for the dental professionals who are looking forward and keen to expand their knowledge on diagnosis of oral lesions towards early detection of oral cancer.

**Workshop Details:** 1-day workshop
