WORLD HEALTH DAY

The World Health Day is a global health awareness day celebrated every year on 7 April, under the sponsorship of the World Health Organization (WHO), as well as other related organizations. In 1948, the WHO held the First World Health Assembly. The Assembly decided to celebrate 7 April of each year, with effect from 1950, as the World Health Day. The World Health Day is held to mark WHO's founding, and is seen as an opportunity by the organization to draw worldwide attention to a subject of major importance to global health each year. The WHO organizes international, regional and local events on the Day related to a particular theme. World Health Day is acknowledged by various governments and non-governmental organizations with interests in public health issues, who also organize activities and highlight their support in media reports, such as the Global Health Council.

Healthy life makes the people live with high confidence and peace to work accurately and quickly. There are many types of diseases in the environment by which many of the people are suffering from many kinds of diseases . it is important for the people to get every knowledge of the health to make the health of the people better for lots of work to be accomplished. Keeping this in mind the WHO has decided to keep this year's slogan as " Health for all".

At Tagore dental college a screening camp was organized at the temple in chrompet, with the vision that all people should be aware about their health status. Our program was themed "Health for all". Our department staff and interns actively participated in the program. Nearly 200 people attended it wherein their oral health status, blood sugar, weight and blood pressure were checked. Posters highlighting the importance and awareness of health were displayed and explained the people.

We thank our Principal and the management for providing us this opportunity to enable us to outreach the masses that were devoid of awareness and status of their health.
